

NGUYEN DUC THINH

Full-stack Developer

Ho Chi Minh City, Vietnam | +84 792 844 082 (WhatsApp) | ducthinh120199@gmail.com | GitHub | Portfolio

CAREER OBJECTIVE

Full-stack Developer with 5+ years of experience — particularly strong in frontend development and enterprise systems integration — building scalable web applications and customizing Microsoft Dynamics 365 (CRM). Strong in system integration, automation, and cloud deployment, with growing backend expertise in Java/Spring Boot. Seeking to contribute to enterprise digital transformation projects with a long-term growth mindset.

EDUCATION

Oct 2017 - Oct 2020: University of Science — Associate Degree in Information Technology

WORK EXPERIENCE

Aug 2022 - Present **VUS - Vietnam USA Society English Centers**

Software Engineer (Full-stack & D365)

TMK Portal (D365 Customization)

Description: Large-scale internal portal for telemarketing operations and data visualization

Team size: 3 members

Role: Dynamics 365 Developer

Technologies: Vue.js, Dynamics 365 Custom Web Resources

- Developed internal telemarketing portal using Dynamics 365 Custom Web Resources.
- Built UI components aligned with enterprise design requirements.
- Queried and processed data using FetchXML from the data warehouse.
- Delivered the system within a tight 1-month timeline with a team of 3 developers.

Digital Class Folder

Description: Management system for digitalizing classroom records and student progress tracking

Team size: 1 member

Role: Full-stack Developer (Main Contributor)

Technologies: Next.js, React, Oracle APEX, PL/SQL, Dynamics 365, Google Cloud Run, Firebase, REST API

- Built the frontend with Next.js and managed deployment on Google Cloud Run.
- Developed custom APIs and D365 plugins for data synchronization with CoreEdu and Vhub.
- Handled full infrastructure setup, including Firebase SSO and server environment configuration.
- Improved data synchronization reliability between systems through custom APIs and D365 plugins.

AI Grading System

Description: Automated grading platform that scores physical answer sheets using AI

Team size: 2 members

Role: Full-stack Developer

Technologies: React, Oracle APEX, PL/SQL, Google Cloud Run, Firebase, REST API, Google Gemini API

- Built an automated grading system using React and Google Cloud Run.
- Designed backend services and deployed on cloud infrastructure.
- Integrated the Google Gemini API for OCR processing of answer sheets.
- Implemented Firebase Authentication and a CI/CD pipeline for deployment.
- Reduced manual grading effort by automating answer-sheet processing with OCR.

Aspiration System (Internal Operations)

Description: Internal system supporting employee operations at VUS

Team size: 2 members

Role: Full-stack Developer

Technologies: jQuery, Oracle APEX, PL/SQL

- Developed an internal system supporting employee operations at VUS.

- Gathered requirements and designed the database schema.
- Implemented business logic using PL/SQL and dynamic content rendering.

Oct 2020 - Aug 2022 JV-IT Techs Co., Ltd

Web Developer

- Developed frontend components using Vue.js/Nuxt.js and Ant Design for enterprise systems.
- Managed application state with Vuex and integrated multiple RESTful APIs.
- Collaborated directly with Japanese clients to resolve UI/UX issues and improve system usability.
- Maintained and optimized WordPress-based platforms for business operations.

TECHNICAL SKILLS

Frontend: Next.js, React, JavaScript (ES6), TypeScript, Vue.js, Nuxt.js, HTML5/CSS3, SCSS, Ant Design

Backend & Database: Oracle APEX, PL/SQL (Dynamic Content, Stored Procedures), SQL Server; currently building Java/Spring Boot

D365 & ERP: Dynamics 365 CE/CRM, Custom Web Resources, Plugins, FetchXML, XrmToolBox

Cloud & DevOps: Google Cloud, Firebase, Cloudflare, Git, CI/CD

AI Tools: OpenAI API, Google Gemini API, v0.dev, Lovable, Google AI Studio

Design: Figma, Adobe XD, Photoshop, Illustrator, Canva

Currently Learning: *Currently expanding backend skills with Java/Spring Boot, Redis, and Kafka through a self-directed flash-sale/seckill ticketing system project.*

ADDITIONAL SKILLS & QUALITIES

Languages: English — professional working proficiency (reading & writing)

Soft Skills: Strong problem-solving, stakeholder management, and a proactive Kaizen mindset

Commitment: High sense of responsibility, diligent, and eager to learn new technologies
